SOFTWARE INTERN

Seeking a challenging software internship for my second year of college, where I can apply and enhance my coding skills, collaborate with a dynamic team, and contribute to meaningful projects, fostering both personal and professional growth in the tech industry.

KEY COMPETENCIES

Web Dev	React.js	Ui/Ux	SQL	Web Design
HTML/CSS	C/C++	Figma	PL/SQL	Framer
JAVA SCRIPT	Python	Canva	MongoDB	JAVA

PROFESSIONAL EXPERIENCE

Research Project   **March 2024 - April 2024**
Home-Security System
Creating a home security system utilizing the 'deepface' Python library powered by the 'Facenet' model for facial detection.

Web Dev Project   **Aug 2023 - Current**
Designed and Developed dynamic websites/pages for micro shops.

ColLabs   **April 2023 - May 2023**
Software that connects students with faculties of other colleges
At the Hack For Impact hackathon, I took charge of developing ColLabs, an exciting platform aimed at linking students and faculty from different colleges. My role? Well, I was the brains behind crafting intuitive interfaces and building sturdy backend systems to ensure smooth communication and collaboration within the educational community.

Research Project   **July 2023 - Oct 2023**
Hotel Management System
Developed and maintained a secure SQL database for a hotel booking website. Ensured data integrity and optimized SQL queries for efficient performance.

EDUCATION & CERTIFICATIONS
